

STRATEGIES FOR PROFESSIONAL GROWTH

GP2 REPORT
TEAM 7

Topic - Future-Proofing Professionals: Cultivating Flexibility and Growth Mindset in the Era of AI

Methodology

Our team explored how professionals build adaptability, continuous learning, and a growth mindset to stay future-ready in the AI era. All members contributed to tool design, interviewing, data analysis, and interpretation.

1. Planning & Design

- Identified core themes (adaptability, continuous learning, growth mindset).
- Created structured interview + survey questions focused on real-world experiences.

2. Primary Data (Interviews)

- Conducted 5 semi-structured interviews (10–30 mins).
- Participants selected for diverse careers and experience levels.
- Common core questions + field-specific follow-ups yielded deep qualitative insights.

3. Primary Data (Survey)

- Google Form survey designed and team-reviewed for clarity.
- Distributed through academic/professional networks to gather broader quantitative trends.

4. Secondary Sources

- Consulted academic articles, credible reports, and organizational case studies.
- Used to validate and strengthen primary findings.

Analysis & Key Insights

1. Human–AI Collaboration

- Professionals see AI as a partner for routine tasks; humans retain judgment and responsibility.
- Aligns with Anthony Goldbloom: AI excels at patterns, humans at exceptions.
- ~90% already use AI tools; confidence level: 3.92/5 → strong readiness.

2. Growth Mindset Fuels Progress

- Professionals learned advanced Excel, iOS deployment, navigation through practice.
- Supports Carol Dweck's idea: skills grow with effort.
- Survey agreement: 4.31/5.

3. Systems Thinking in Daily Work

- Professionals understand how their tasks impact wider operations:
  - e-Billing improved inter-department flow.
  - BWTS affected ship safety/environment.
  - App updates impacted platforms and clients.
- Secondary sources confirm rising importance.

4. Resilience Through Setbacks

- Mistakes became improvement drivers:
  - Retaken exams, improved app releases, better clinical tracking.
- Adaptability score: 3.57/5 → moderate resilience, room to grow.

Recommendations

For Individuals

- Dedicate weekly time to learn and apply new skills.
- Use AI responsibly—understand outputs, don’t copy blindly.
- Map your workflow dependencies to improve communication during change.

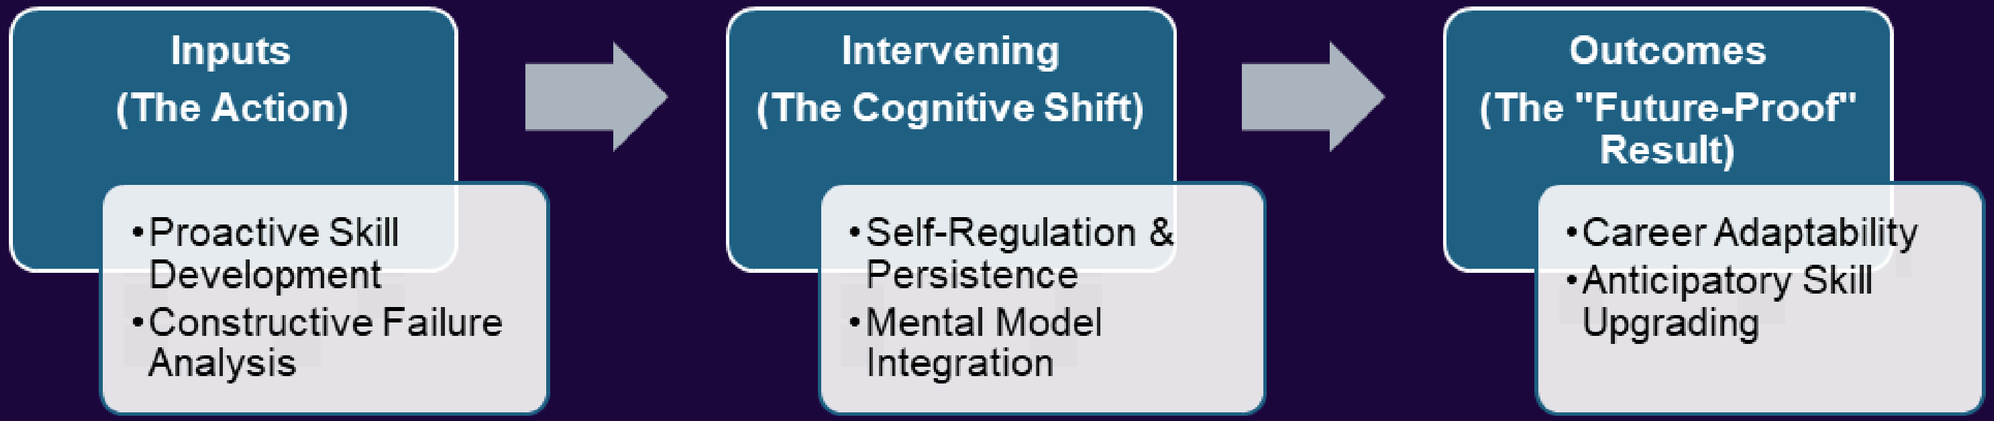

For Organizations

- Establish Human–AI collaboration guidelines (task boundaries).
- Verify foundational skills before giving access to AI tools.
- Promote knowledge-sharing and documentation culture.
- Conduct learning-focused reflection sessions after setbacks.

For Educational Institutions

- Teach AI literacy and systems thinking across disciplines.
- Use project-based learning for real-world problem solving.
- Partner with industries for exposure to current tools and workflows.

Application/Influence Model

Stakeholder Application Map (Case Study Data)

Stakeholder	Roles and Agility
Nikita Keswani	(Application Developer): Learns new frameworks; anticipates AI risk.
Sakshi Baghel	(Controller General of Accounts): Self-taught Excel; adapted to paperless e-bills.
Mohd Yasir	(Navigating Officer): Pressure accelerates learning; human awareness > AI.
Kingshuk Saha	(Clinical Research Associate): Turned error into process improvement.
Ibsen Senjam	(Research Chemist): Failed reactions = learning; intuition not automatable.

Project Review & Closure

S. No.	Task Name	Contributors
1	Project Proposal	All
2	Objectives & Scope	Premshuk, Sabyasachi
3	Identification of Resources	All
4	Project Management Plan	Premshuk, Sabyasachi
5	Team Contract	Mohammad Sarim, Aneeqa H. Siddiqui
6	Team Personality Report	Anushka
7	GP1 Compilation	Anushka
8	Research & Data Collection	Mohammad Sarim, Aneeqa H. Siddiqui
9	Interviews	All
10	Video Presentation	All
11	Final Report Writing	All
12	GP2 Compilation	Anushka

We, the undersigned members of the research team for the report titled "Future Proofing Professionals: Cultivating Flexibility and a Growth Mindset in the Era of AI," submit this Counter-Attestation in support of the report's insights and conclusions.

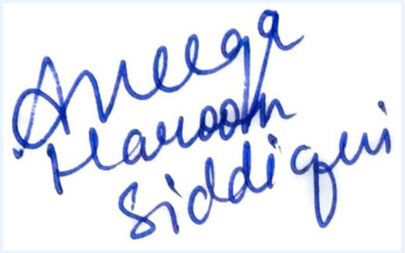

Throughout this study, we engaged in collaborative discussion, evaluation, and analysis on the importance of adaptability, continuous learning, and mindset transformation in an AI-driven workplace.

By signing below, we affirm our commitment to academic integrity and confirm that these statements reflect our shared understanding of the report's findings.

Mohammad Sarim (21f2001224)

Aneeqa Harron Siddiqui (21f2000377)

Anushka (21f1003889)

Premshuk Saha (23f1000448)

Watham Sabyasachi (22f2000095)
