Team Diversity

Our team represents a blend of diverse academic and professional backgrounds, bringing together unique strengths from social sciences, management, mathematics, engineering, and data science. This diversity enables us to approach problems from multiple perspectives and build well-rounded solutions.

Mohammad Sarim – Holds a Bachelor's in Sociology and English and is pursuing a B.S. in Data and Applications from IIT Madras. With experience in community welfare and education, he brings human-centered insights and a strong social perspective to the team.

Aneeqa H. S – Completed her Bachelor's in Mathematics and is pursuing Data Science at IIT Madras along with a Master's in Statistics. Her quantitative mindset and analytical skills strengthen the team's statistical and logical foundation.

Anushka – MBA in General Management from Dayalbagh Educational Institute, Agra, with HR experience and a passion for analytics. She connects management principles with data-driven strategies, ensuring structured and goal-oriented collaboration.

Watham Sabyasachi – Electrical Engineering graduate with interests in Power Electronics and Machine Learning. His technical expertise and coding skills add depth to the team's computational and problem-solving capabilities.

Watham Sabyasachi – Electrical Engineering graduate with experience in Power Electronics and a growing focus on Machine Learning. His career pivot from hardware to data, combined with diverse technical skills and unique personal perspectives, adds creativity, adaptability, and a fresh outlook to any team.

Prem Sukh Saha – Data Science learner with a keen interest in data exploration and collaborative research. He encourages knowledge sharing and inclusivity, fostering an environment of mutual growth.

Together, our interdisciplinary mix allows us to combine human understanding, analytical rigor, managerial thinking, and technical innovation — making our team diverse, balanced, and effective.
