INTERIM REPORT

TEAM 07

Team Member	Guest	Designation
Aneeqa Haroon Siddiqui	Ms. Nikita Keswani	Application Developer
Anushka	Ms. Sakshi Baghel	Controller General of Accounts
Mohammad Sarim	Mr. Mohd Yasir	Navigating Officer
Premshuk Saha	Mr. Kingshuk Saha	Clinical Research Associate
Watham Sabyasachi	Ms. Ibsen Senjam	Research Chemist

INTERVIEWER: ANEEQA HAROON SIDDIQUI

PARTICIPANT PROFILE

Name: Ms. Sakshi Baghel
Industry: Information Technology (Mobile App Development)
Role: Application Developer (Flutter), Sort Strings Solutions LLP
Experience: 2.5 Years
Interview Date: 01 November 2025

Key Insights

GROWTH MINDSET

Nikita believes that **"learning never stops,"** especially in the tech field where developers must constantly read documentation, explore new frameworks, and stay current with updates. She shared, **"If you don't upgrade yourself, you will not be considered an asset for the company."** Her passion for Flutter stems from its dynamic, cross-platform nature, which she describes as **"one codebase that can build for Android, iOS, web, and desktop."**

ADAPTABILITY AND PERSISTENCE

She recalled a challenge when her senior iOS developer resigned unexpectedly, leaving her to manage iOS development independently. Despite multiple app rejections, she succeeded: **"If you work in the right direction with calm and persistence, you can succeed."** Nikita emphasized that adaptability and patience are critical traits for surviving rapid industry changes like Android version updates and evolving tools.

AI AND FUTURE OF WORK

Nikita views AI as a valuable assistant rather than a replacement. **"AI makes your code easy breezy,"** she noted, but cautioned against overreliance: **"AI can help you code faster, but not think better."** She observed that juniors often copy AI-generated code without understanding it, warning that **"AI tools will help you but can also make you lethargic if used blindly."**

CONTINUOUS LEARNING AND SECURITY AWARENESS

She highlighted the rising importance of data protection and cybersecurity, stressing that **"developers must know how to secure their applications and servers."** For her, continuous learning includes expanding into Kotlin and Swift alongside Flutter to remain versatile across platforms.

ADVICE TO FUTURE DEVELOPERS

Nikita urged young professionals to evolve with technology: **"New frameworks and tools will keep coming every year, but only those who keep learning and adapting will succeed."** She concluded that **"AI will not take the jobs of skilled labor, it will only replace those who stop improving."**

KEY TAKEAWAY

> "Flexibility and curiosity keep you future-proof. Technology will keep changing, but a learning mindset never goes out of demand."
> **Ms. Nikita Keswani**
> Application Developer

INTERVIEWER: ANUSHKA

PARTICIPANT PROFILE

Name: Ms. Sakshi Baghel
Industry: Government Sector
Role: Controller General of Accounts
Experience: 1.5 Years
Interview Date: 02 November 2025

Key Insights

ADAPTABILITY THROUGH SELF LEARNING

Faced with the challenge of handling large data calculations, she learned Excel independently through online tutorials. This experience highlighted her self motivation, persistence, and openness to learning new technologies to enhance her performance.

PERSISTENCE AND PERSONAL DEVELOPMENT

Public speaking once felt intimidating to her, but through consistent effort and practice, she overcame this barrier. "I worked on my English and now have the confidence to host small events," she shared. Her experience shows how deliberate effort can convert personal limitations into strengths.

FUTURE OF ACCOUNTING AND ETHICAL OVERSIGHT

She believes physical records will soon become obsolete as AI-driven tools take over repetitive tasks. However, she emphasized that human judgment and ethics will always be vital: "AI can take repetitive tasks, but a human is still required to oversee and take relevant judgments." Her foresight highlights the importance of balancing technology with human integrity and analytical skills.

EMBRACING ORGANIZATIONAL CHANGE

She described how the adoption of e-bills in her department eliminated paper-based processes and improved overall efficiency. Recognizing that organizational sections are interdependent, she viewed this shift as proof that technological upgrades can transform productivity and transparency across systems.

LEARNING FROM SETBACK

Nikita urged young professionals to evolve with technology: **"New frameworks and tools will keep coming every year, but only those who keep learning and adapting will succeed."** She concluded that **"AI will not take the jobs of skilled labor, it will only replace those who stop improving."**

KEY TAKEAWAY

> "Technology can assist, but growth comes from persistence, ethics, and the willingness to keep learning."
>
> **Ms. Sakshi Baghel**
> Controller General of Accounts

INTERVIEWER: MOHAMMAD SARIM

PARTICIPANT PROFILE

Name: Mr. Mohd Yasir
Industry: Maritime
Role: Navigating Officer
Experience: 4 Years
Interview Date: 26 October 2025

Key Insights

Growth Mindset in Maritime Industry

Promotions are earned through dedication, written and oral examinations, and required sea-time. Mr. Yasir believes adopting a growth mindset is essential for long-term professional advancement.

Learning Under Pressure

Life at sea demands discipline, alertness, and patience. Mr. Yasir shared that new officers learn through real-time challenges, gaining resilience and focus. Pressure, he quoted, is the best teacher at sea.

System Awareness and Teamwork

With new technologies like the Ballast Water Treatment System, Mr. Yasir learned operations independently and trained his juniors. He believes shared knowledge and system awareness strengthen teamwork and safety.

Future of Work – Maritime Perspective

Mr. Yasir believes that automation and AI will continue reshaping maritime operations. However, he emphasized that human judgment, discipline, and decision-making under pressure remain irreplaceable skills. This insight connects strongly to our project theme — future professionals must balance technology with emotional intelligence.

KEY TAKEAWAY

- “Promotions are earned, not given.”
- “Pressure teaches faster than comfort.”
- “Discipline keeps the ship safe.”
- “AI can’t replace awareness.”

Mr Mohd Yasir
Navigating office(Gas Carrier Operations)

INTERVIEWER: PREMSHUK SAHA

PARTICIPANT PROFILE

Name: Mr. Kingshuk Saha
Industry: Clinical Research
Role: Clinical Research Associate
Experience: 4+ Years
Interview Date: 01 November 2025

Learning from Mistakes

Reframed a "stressful" error into a robust process improvement, increasing long-term confidence.

View of AI

: Sees AI as a tool to automate "manual checks," insisting "human judgment will still be crucial.

Key Insights

Growth Mindset in Clinical Research Industry

Believes skills "naturally grow with experience" and views new tasks as "opportunities to understand things better.

Proactive Adaptation

Learns new systems/topics with patience, practice, and self-education, eventually teaching others

KEY TAKEAWAY

“Staying curious is the key... the drive to learn and improve is what really keeps us 'future-proof. “

Mr Kingshuk Saha
Clinical Research Associate

Interviewer: Watham Sabyasachi

PARTICIPANT PROFILE

Name: Ms. Ibsen Senjam
Industry: Pharmaceutical Research
Role: Research Chemist
Experience: 1 Years
Interview Date: 01 November 2025

Key Insights

Growth Mindset

Believes that scientific understanding grows with persistence and curiosity. Every new experiment is viewed as a step toward mastering complex ideas rather than proving immediate success.

Problem-Solving & Adaptability

Approaches challenges through observation and iteration, refining methods based on what each trial reveals. Adapting to new techniques or tools is seen as a natural part of progress

Integrity & Responsibility

Stressed that research should remain transparent and ethical. Data honesty, environmental care, and accountability are non-negotiable elements of good science.

Teamwork & Knowledge Sharing

Highlights collaboration as the backbone of meaningful research. Regularly exchanges insights with colleagues, believing that shared experience multiplies innovation and reduces risk.

LEARNING FROM SETBACKS

Sees failed reactions or inconclusive results as learning opportunities. Each setback improves both precision and patience, shaping stronger decision-making over time.

AI and Future Work

Believes automation and AI will support chemists by analyzing data and predicting trends, but insists that intuition and creativity and that “the human touch” remain essential for discovery.

KEY TAKEAWAY

> “Curiosity keeps research alive — it’s what turns uncertainty into discovery.
>
> Ms. Ibsen Senjam
> Research Chemist
