BSc DS & AI, IIT Madras. Empathetic, reflective, and data-driven; strong in HR & analysis.

SWOT ANALYSIS

Strengths
Complementary skills | Strong research & problem-solving | High motivation in AI & innovation

Opportunities
Develop core future skills (AI, adaptability, leadership) | Build interdisciplinary portfolio

Weaknesses
Limited prior collaboration | Varying work rhythms

Threats
Tight schedules | Information overload risk

Team Diversity:

Leaders (ENTJ, ENFJ), creative analyst (INFP), and practical technologist (ISTP) — ensuring vision, empathy & execution.

Topic -> Future-Proofing Professionals: Cultivating Flexibility and Growth Mindset in the Era of AI

Objective:

To explore how emerging technologies like Artificial Intelligence, automation, and digital platforms are transforming the nature of work and the skills required to thrive.

9. *Forbes. (2023, October 5). *Adobe’s shift to subscriptions shows how flexibility and a growth mindset enable AI-ready innovation.* Forbes.*

Draft Questions

01 How do you personally view the idea that skills and intelligence can be developed over time?

02 Can you share an example of a time you had to learn something new at work that challenged your abilities? What helped you persist?

03 When your organization faces a major change (like adopting new tech or processes), how do you approach understanding its wider impact across teams or systems?

04 Tell me about a time when sheer persistence and effort were the main reasons for your success, especially in an area where you weren't the most naturally skilled person.

05 Success is a great teacher, but failure can be an even better one. Tell me about your most instructive professional failure and what it taught you about your own work process.

06 Think about your profession five years from now. What is one core belief or 'best practice' from today that you suspect might be completely obsolete, and how are you preparing for that possibility?

Note: Additional follow-up questions will be asked during the interviews based on each interviewee’s profession and responses, to deepen the discussion.
